### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Douglas McKnight on 4<sup>th</sup> of March 2009.

The applicant has agreed to amend the claims in order to avoid an objection for failing to further limit claim 1. As such the claims have been amended as follows:

Claims:

2. (Currently amended) The modular device according to claim 1, wherein the joint is adapted to allow rotation on at least one axis and/or revolution around a point ~~and/or a linear~~ movement.

3. (Canceled)

18. (Currently amended) The modular device according to claim 16, wherein the joint is adapted to allow rotation on at least one axis and/or revolution around a point ~~and/or a linear~~ movement.

### **DETAILED ACTION**

#### ***Allowable Subject Matter***

Claims 1, 2, and 4-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2884

Claims 1, 13, 14 and 16 as amended are considered allowable for reasons of record as noted by applicant's response on 22 December 2008. Particularly the prior art fails to teach or reasonably suggest, along with the other claimed limitations, a modular radiation detector with first and second connector elements that form a joint, wherein the *joint is adapted to allow rotation* of each module relative to the carrier and to allow said set of modules to *self-align* by mutually contacting each other (emphasis added). With specific regard to claim 16 this holds for the joint that is a ball and socket joint.

As can be seen in the prior art modular detectors are known, such as with Dobbs and Sherman, and the other art made of record, these modular devices do not use a ball and socket joint thus connecting to the base in a manner that allows rotation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
